WHEAT HARVEST, 1929-30.

The Government Statist reports that the tabulation of the actual results of the wheat crop for last Season received to date from farmers indicate that the ^{December} Official estimate of 23,600,000 Bushels is likely to be fully realized. There are many returns still out, hence it is not expected that the completed results of the Area cropped and ^{final} yields of wheat, Barley and Oats will be available before the first week in June.
